

SUCCESSFUL STORY

Titan Dome Arena has 456,450 square meters base area and 231,506 square meters floor area. The main building is a two-story underground and seven-story facility that included distal stage, concert, etc. and can accommodate 25,000 people, while has 148 VIP rooms, each room offer 15-20 VIP space capability.

Challenge: The Titan Dome Arena hosts hundreds of sport and concert events every year. The terrorist attacks have become more frequent, and violence fans are commonplace in recent years. This news has made the owner aware of security issues for sport and concert events will become very important. They want a happy ending when people join these events, also has the ability as below.

- ▼ Identify banned fans, stalkers, and potential criminals in seconds, will not delay the audience entry time.
- ▼ Automate video surveillance at a fraction of the cost.
- ▼ Recognize faces in crowded spaces.
- ▼ Easy to add/delete VIP and Blacklist database for each sport and concert events

Solution:

25 violent fans and terrorists were played by the organizers and arena employees, i-view obligations to set up a face recognition system at the four main entrances in a small 3,000-person concert. The powerful and rapid i-View's Face Recognition solution eliminated the barriers that the owner had been worrying.

Finally, Titan Dome Arena selected the i-View QkDefine® Face Recognition as their stadium failsafe security solution.

Result:

Titan Dome Arena was able to deploy the Face Recognition system for their arena to protect 25,000 audiences, In addition to providing the perfect place for the event, the arena also protects the safety of all participants by the i-View QkDefine® face recognition solution, helped the client to extend the video surveillance to prevent crime. Titan Dome Arena was extremely pleased with their ability to:

- ▼ Sporting events and concerts are increasingly attractive targets for terrorism and violence. The QdDefine® face recognition system can instantly alert security personnel about the presence of criminals and terrorists to keep t audiences safe.
- ▼ Hundreds of fans get banned from sporting events each season, but your security staff can't possibly remember them all. Face recognition instantly alerts security professionals the moment a banned fan tries to return to the stadium.
- ▼ Share face recognition with law enforcement and leverage data from local, state and national law enforcement agencies.
